ABOUT ME

Mechatronics and Artificial Intelligence student at the Indonesia University of Education. Experienced as a staff member of Commission 1 of HIMATRONIKA-AI and project experience in IoT and automation systems. Skilled in using microcontrollers, circuit design, and PLC programming with software such as PROTEUS, EAGLE, CX-PROGRAMMER, Arduino IDE, ISPsoft, and FluidSIM. Enthusiastic about applying technical skills in a professional environment and seeking internship opportunities to deepen hands-on experience in IoT, automation, or mechatronics engineering.

EDUCATION

Indonesia University of Education (UPI) — Major Mechatronics and Artificial Intelligence — GPA: 3.72
Sept 2023 – Present | **Core Courses:** Electronics, Control Systems, Microcontrollers, PLC, IoT, Robotics

EXPERIENCE & ORGANIZATIONS

Commission 1 Staff – HIMATRONIKA-AI Jan 2024 – Dec 2024

- Supervise the performance of the treasury department
- Supervise the performance of the secretary department.
- Supervise the performance of the entrepreneurship departmen

Logistics Staff – Trisula Suaka Apr 2025 – July 2025

- Manage procurement, storage, and distribution of event equipment and supplies.
- Prepare and organize the venue according to the event plan and technical requirements, coordinating with other divisions.
- Arrange accommodation for the committee at the event location.
- Ensure availability and proper documentation of all items needed throughout the event.

PROJECTS

- **Automatic Rice Weighing System** – ESP32-based scale using load cell and infrared sensors for automatic rice measurement.
- **Smart Nutritions Monitoring System** – ESP32-based IoT system for real-time soil nutrition and environmental monitoring, integrating machine learning and fuzzy expert system for decision support in agriculture.
- **Camera-Based Firefighting Line Follower** – Line-following robot that uses a camera for flame detection, then autonomously follows the track and advances toward the fire point for extinguishing.
- **Dynamo-Based Powerbank** – Portable powerbank using dynamo-based energy harvesting with smart charging for mobile devices on the go.
- **Delta PLC Automation System** – Project using ISPSoft and DOPSoft to simulate tank water level control, conveyor bottle filling, and real-time HMI monitoring of sensors and actuators.
- **Redesign Website Yamaha Fortuna Cirebon** – Company profile website supporting motorcycle sales, spare parts, and service booking with an admin dashboard for content management.
Tech: Laravel, HTML, CSS, JavaScript, MySQL
- **Hydraulic Cutting Machine Trainer** – Omron PLC-based hydraulic trainer controlling a double-acting cylinder with sensors and emergency stop.

SKILLS & CERTIFICATES

Soft Skills: Public Speaking, Collaborative, Problem Solving, Critical Thinking.

Technical Skills: PLC & HMI, Arduino, ESP, Electrical Wiring

Software Tools: PROTEUS, CX-Programmer, Arduino IDE, ISPsoft, FluidSIM

Certificate: Certificate Introduction to Cloud (Cognitive Class 2025), Certificate of Cloud Essentials (IBM 2025), Certificate Machine Learning with Python (Cognitive Class 2025), Python 101 for Data Science (Cognitive Class 2025)
